CHAPTER 1 | INTRODUCTION

1.1 Purpose

The purpose of software requirement specification is used to describe the operation of software that will be developed by developers. Software requirement specification will be an agreement between developers and stakeholder. This document is provided for the users and developers to explicit understand the detail of each requirement. The purpose of Promotion Provider, we aim to provide people the easiest way to search for restaurants to go. The project will focus exclusively on the providing promotion and notification when the user gets closer than 20 meters. Also, the SRS document is used in the software design phase, which is lead to consistency between the software product and functional requirement.

1.2 Intended Audience and Reading Suggestions

This Software Requirement specification (SRS) is intended to use for:

1. Developer can read and understand how Promotion Provider works and they can use this document to help them in implementation phrase easier.
2. Customer can read and understand the overall of the system by this document.
3. User can use this document to understanding how use the software and all features.
4. This document using to be a reference for testing system.

1.3 Software Scope

Promotion Provider is an application on iOS platform. We develop this application for letting user know the special offer. It can provide a much needed restaurant, and help user to get direction to the restaurant. It is also the simply way to find which restaurant has a promotion. It can help the users make a decision which restaurant is the most appropriate one to go, and it also help saving time that may be wasted during the process of searching for the place. The scope of software has controlled by the user requirements.

1.4 Operation Environment

Promotion Provider support only iOS7 on device iPhone4 and iPhones 5, iPod touch. This application is not available without Internet connection and GPS may not accurate in the rainy day.

1.5 Definition, Acronyms and Abbreviation

1.5.1 Key Definition

- IEEE Institute for Electrical and Electronics Engineers. Biggest global interest group for engineers of different branches and for computer scientists. [IEEE90]
- Requirement (1) A condition or capability needed by a user to solve a problem or achieve an objective. (2) A condition or capability that must be met or possessed by a system or system component to satisfy a contract, standard, specification, or other formally imposed document. (3) A documented representation of a condition or capability as in definition (1) or (2). [IEEE90]
- Feature Transformation of input parameters to output parameters based on a specified algorithm. It describes the functionality of a product in the language of the product. Used for requirements analysis, design, coding, testing or maintenance.[IEEE90]
- Use Case (1) Concept to describe a system based on usage of system resources by its environment. Characterized by an objective set of interactions within and at the borders of that system. (2) Notation from UML for describing a scenario (Usage approach, operational scenario) from the perspective of its users. [IEEE90]
- Web Application A computer software application that is coded in a browser supported and reliant on a common web browser to render the application executable.
- Software Engineering The application of a systematic, disciplined, quantifiable approach to the development, operation, and maintenance of software; that is, the application of engineering to software.” [IEEE90]
- Specification Precise description of an activity or work product which serves as basis or input for further activities or work product. A specification can comprise requirements to a product and how they will be solved. Different parts of a specification (e.g., what is to be done, how it will be done) must not be mixed.[IEEE90]

CHAPTER 2 | OVERALL DESCRIPTION & REQUIREMENT

2.1 Product Perspective

Promotion Provider is an application on iOS platform. This application allows a user conveniently find a special offer or promotion from the restaurant or hotel, as well as get the notification while the user gets close to the restaurant. It also provides the route and distance to the restaurant. It will advise a famous restaurant to the user without any typing. It can receive information from the owners who want to promote their business. It can receive feedback and review from the user. The user allows to share and check in to show their friend. We will develop this application to be guidance for the tourist who use iPhones and is controlled the quality of software following the ISO29110.

2.2 Product Features

This section is outlines all functions of Promotion Provider.

2.2.1 Web Server

Web server provided shops, promotions to iOS application. Administrator can manage all information included shops and promotions. Shop owners can manage their own promotions and their own account.

Admin able to:

- Log in
- Log out
- Manage account
 - Add account
 - Edit account
 - Delete account
- Manage Promotion
 - Add promotion
 - Edit promotion
 - Delete promotion
- Accept register request
- Reject register request
- Search
 - Search account by shop name

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	7 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

- Search account by email
 - Search account by id
 - Search promotion by name
 - Search promotion by id
 - Search promotion by shop name
 - Search user's logs by function
 - Search user's logs by shop name
 - Search user's logs by email
- View
 - Shop list
 - Promotion list
 - Shop information
 - Promotion information
 - User's action logs
 - Redeem code list
 - Redeem code information
 - Mobile user list
 - Mobile user information
- Change password

Shop owner able to:

- Log in
- Log out
- Mange promotion
 - Add promotion
 - Edit promotion
 - Delete promotion
- Change password
- Submit redeem code

Guest able to:

- Sent register request

2.3 User Class and Characteristics

Promotion Provider is an iOS mobile application on iPhone, it provides the promotions for users. Admin should be able to manage all information on web server. Shop owner should be able to create promotions on the web server. Mobile user should be received a notification when they get close enough to the restaurant where has the promotion.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	8 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

2.4 Constraints

- CO-01: The web server cannot provide information to mobile application without internet connection.
- CO-02: Mobile application supports iOS7 or later on device iPhone4 and iPhone5, iPhone 6 and iPod touch.
- CO-03: Mobile application not available without Internet connection.
- CO-04: Mobile application requires turning on location service on the user mobile for identifying the user location.

Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

CHAPTER 3 | FUNCTIONAL REQUIREMENT

3.1 User Requirement Specification

3.1.1 Administration (Web Server)

- **URS-01:** Admin can login to web server
- **URS-02:** Admin can logout from web server
- **URS-03:** Admin can add shop owner account
- **URS-04:** Admin can edit shop owner account
- **URS-05:** Admin can delete shop owner account
- **URS-06:** Admin can add promotion to shop owner
- **URS-07:** Admin can edit shop owner promotion
- **URS-08:** Admin can delete shop owner promotion
- **URS-09:** Admin can accept register request
- **URS-10:** Admin can reject register request
- **URS-11:** Admin can view account list
- **URS-12:** Admin can view account information
- **URS-13:** Admin can view promotion list
- **URS-14:** Admin can view promotion information
- **URS-15:** Admin can view redeem code list
- **URS-16:** Admin can view redeem code information
- **URS-17:** Admin can view mobile user list
- **URS-18:** Admin can view mobile user information
- **USR-29:** Admin can search account by shop name
- **URS-20:** Admin can search account by email
- **URS-21:** Admin can search account by id
- **URS-22:** Admin can search promotion by name
- **URS-23:** Admin can search promotion by id
- **URS-24:** Admin can search promotion by shop name
- **URS-25:** Admin can change password

3.1.2 Shop owner (Web Server)

- **URS-26:** Shop owner can add promotion
- **URS-27:** Shop owner can edit promotion

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	10 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

- **URS-28:** Shop owner can delete promotion
- **URS-29:** Shop owner can update their profile
- **URS-30:** Shop owner can change password
- **URS-31:** Shop owner can log in to web server
- **URS-32:** Shop owner can log out from web server
- **URS-33:** Shop owner can submit redeem code
- **URS-34:** Shop owner can view promotion list
- **URS-35:** Shop owner can promotion information

3.1.3 Guest (Web Server)

- **URS-36:** Guest can send register request

3.2 System requirement specification

- **SRS-01:** The system shall provide user interface to log in.
- **SRS-02:** The system shall verify email and password.
- **SRS-03:** The system shall keep user's session.
- **SRS-04:** The system shall destroy session.
- **SRS-05:** The system shall provide user interface to logout.
- **SRS-06:** The system shall provide add account user interface to add new shop owner account.
- **SRS-07:** The system shall check not available email in database.
- **SRS-08:** The system shall provide user interface to delete shop owner
- **SRS-09:** The system shall provide user interface to delete promotion
- **SRS-10:** The system shall provide user interface to accept register request
- **SRS-11:** The system shall check all input required.
- **SRS-12:** The system shall record new account into database.
- **SRS-13:** The system shall provide edit account page to edit shop owner account.
- **SRS-14:** The system shall update new input information to database.
- **SRS-15:** The system shall verify redeem code
- **SRS-16:** The system shall provide user list.
- **SRS-17:** The system shall update account status.
- **SRS-18:** The system shall provide add promotion user interface to add new promotion.
- **SRS-19:** The system shall check consistency between start date and end date.
- **SRS-20:** The system shall check all input required.
- **SRS-21:** The system shall record new promotion into database.
- **SRS-22:** The system shall provide edit promotion user interface to edit promotion.
- **SRS-23:** The system shall provide promotion list.
- **SRS-24:** The system shall update promotion status.
- **SRS-25:** The system shall create a directory for account

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	11 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

- **SRS-26:** The system shall create a sub directory for profile
- **SRS-27:** The system shall upload image to directory.
- **SRS-28:** The system shall get file path.
- **SRS-29:** The system shall create a sub directory for promotion
- **SRS-30:** The system shall remove image in directory.
- **SRS-31:** The system shall check there is no image in directory
- **SRS-32:** The system shall remove directory
- **SRS-33:** The system shall remove image path in database.
- **SRS-34:** The system shall update user interface
- **SRS-35:** The system shall record user action in database
- **SRS-36:** The system shall select data from database
- **SRS-37:** The system shall return account list
- **SRS-38:** The system shall update register request status
- **SRS-39:** The system shall provide user interface to reject register request
- **SRS-40:** The system shall get data from database
- **SRS-41:** The system shall provide user interface to show account list
- **SRS-42:** The system shall provide user interface to show account information
- **SRS-43:** The system shall provide user interface to show promotion list
- **SRS-44:** The system shall provide user interface to show promotion information
- **SRS-45:** The system shall provide user interface to show user logs
- **SRS-46:** The system shall provide user interface to show redeem code list
- **SRS-47:** The system shall provide user interface to show redeem code information
- **SRS-48:** The system shall provide user interface to show mobile user list
- **SRS-49:** The system shall provide user interface to show mobile user information
- **SRS-50:** The system shall find account by shop name in database
- **SRS-51:** The system shall find account by shop email in database
- **SRS-52:** The system shall find account by shop id in database
- **SRS-53:** The system shall return promotion list
- **SRS-54:** The system shall find promotion by name in database
- **SRS-55:** The system shall find promotion by id in database
- **SRS-56:** The system shall find promotion by shop name in database
- **SRS-57:** The system shall verify password and confirm password
- **SRS-58:** The system shall deduct mobile user point
- **SRS-59:** The system shall update redeem code status
- **SRS-60:** The system shall provide register request page to send request to register.
- **SRS-61:** The system shall record new request into database.

3.3 User Requirement Specification with System Requirement Specification.

3.3.1 Administration (Web Server)

URS-01: Admin can login to web server

Admin can log in to system by input email and password. The operations in system mostly required to log in to identify user role and user information.

SRS-01: The system shall provide user interface to log in.

SRS-02: The system shall verify email and password.

SRS-03: The system shall keep user's session.

URS-02: Admin can logout from web server

Admin can log out from server. When the admin log out, admin can't do anything with system

SRS-05: The system shall provide user interface to logout.

SRS-04: The system shall destroy session.

URS-03: Admin can add shop owner account

Admin can add or create shop owner account to system. Admin have to input shop owner information to the system. After admin completed add shop owner account, that account will allowed logging in to system.

SRS-06: The system shall provide add account page to add new shop owner account.

SRS-07: The system shall check not available email in database.

SRS-25: The system shall create a directory for account

SRS-26: The system shall create a sub directory for profile

SRS-27: The system shall upload image to directory.

SRS-28: The system shall get file path.

SRS-11: The system shall check all input required.

SRS-12: The system shall record new account into database.

URS-04: Admin can edit user account

Admin can edit user account in system by update existing information or input new information. Email is the only one information that cannot changed.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	13 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

SRS-13: The system shall provide edit account page to edit user account.

SRS-11: The system shall check all input required.

SRS-14: The system shall update new input information to database.

URS-05: Admin can delete user account

Admin can delete unwanted account in system. After admin deleted account, the account will not allow to login to system anymore and account cannot do anything with system.

SRS-08: The system shall provide user interface to delete user

SRS-30: The system shall remove image in directory.

SRS-31: The system shall check there is no image in directory

SRS-32: The system shall remove directory

SRS-33: The system shall remove image path in database.

SRS-17: The system shall update account status.

SRS-34: The system shall update user interface

URS-06: Admin can add promotion to shop owner

Admin can add promotion to shop owner account. Admin have to input promotion information. When admin has added promotion to shop owner account, the promotion will appear in shop owner promotion.

SRS-18: The system shall provide add promotion user interface to add new promotion.

SRS-19: The system shall check consistency between start date and end date.

SRS-29: The system shall create a sub directory for promotion

SRS-27: The system shall upload image to directory.

SRS-28: The system shall get file path.

SRS-20: The system shall check all input required.

SRS-21: The system shall record new promotion into database.

URS-07: Admin can edit shop owner promotion

Admin can edit shop owner promotion in system by update existing information or input new information.

SRS-22: The system shall provide edit promotion user interface to edit promotion.

SRS-19: The system shall check consistency between start date and end date.

SRS-20: The system shall check all input required.

SRS-21: The system shall record new promotion into database.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	14 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

URS-08: Admin can delete shop owner promotion

Admin can delete unwanted promotion in shop owner account. When promotion has been deleted, it will disappear from shop owner account.

SRS-09: The system shall provide user interface to delete promotion

SRS-30: The system shall remove image in directory.

SRS-31: The system shall check there is no image in directory

SRS-32: The system shall remove directory

SRS-33: The system shall remove image path in database.

SRS-24: The system shall update promotion status.

SRS-34: The system shall update user interface

URS-09: Admin can accept register request

Admin can accept or approve register request from guest. After admin accepted request, guest can login to system.

SRS-10: The system shall provide user interface to accept register request

SRS-38: The system shall update register request status

SRS-12: The system shall record new account into database.

URS-10: Admin can reject register request

Admin can reject register request from guest. This operator can not undo.

SRS-39: The system shall provide user interface to reject register request

SRS-38: The system shall update register request status

URS-11: Admin can view account list

Admin can view user account list in system.

SRS-40: The system shall get data from database

SRS-41: The system shall provide user interface to show account list

URS-12: Admin can view account information

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	15 / 10

Admin can search promotion by input shop name

SRS-56: The system shall find promotion by shop name in database

SRS-53: The system shall return promotion list

SRS-43: The system shall provide user interface to show promotion list

URS-25: Admin can change password

Admin can change their password

SRS-57: The system shall verify password and confirm password

SRS-13: The system shall update new input information to database

3.3.2 Shop owner (Web Server)

URS-26: Shop owner can add promotion

Shop owner can add their own promotion. The shop owner have to input promotion information. When shop owner has added promotion then the promotion will appear on their shop.

SRS-18: The system shall provide add promotion user interface to add new promotion

SRS-19: The system shall check consistency between start date and end date

SRS-29: The system shall create a sub directory for promotion

SRS-27: The system shall upload image to directory

SRS-28: The system shall get file path

SRS-20: The system shall check all input required

SRS-21: The system shall record new promotion into database

URS-27: Shop owner can edit promotion

Shop owner can edit their own promotion. This operation, shop owner can update the existing information or shop owner might input new information included promotion image.

SRS-22: The system shall provide edit promotion user interface to edit promotion

SRS-19: The system shall check consistency between start date and end date

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	18 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

SRS-20: The system shall check all input required.

SRS-21: The system shall record new promotion into database.

URS-28: User can delete promotion

Shop owner can delete unwanted promotion. When shop owner has deleted their promotion, the deleted promotion will disappear from shop owner account. This operation can not undo.

SRS-09: The system shall provide user interface to delete promotion

SRS-30: The system shall remove image in directory

SRS-31: The system shall check there is no image in directory

SRS-32: The system shall remove directory

SRS-33: The system shall remove image path in database

SRS-24: The system shall update promotion status

SRS-34: The system shall update user interface

URS-29: Shop owner can update their profile

Shop owner can edit their own profile. This operation, shop owner can update the existing information or user might input new information included shop image

SRS-13: The system shall provide edit account page to edit user account

SRS-11: The system shall check all input required

SRS-14: The system shall update new input information to database

URS-30: Shop owner can change password

Shop owner can change their password

SRS-57: The system shall verify password and confirm password

SRS-14: The system shall updates new input information to database

URS-31: Shop owner can log in to web server

Shop owner can log in to system by input email and password. The operations in system mostly required to log in to identify user role and user information.

SRS-01: The system shall provides user interface to log in

SRS-02: The system shall verifies email and password

SRS-03: The system shall keeps user's session

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	19 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

URS-32: Shop owner can log out from web server

Shop owner can log out from server. When the shop owner logs out they can't do anything with system

SRS-05: The system shall provides user interface to logout

SRS-04: The system shall destroy session

URS-33 Shop owner can submit redeem code

Shop owner can submit redeem code which is get from mobile user. This operation uses to deduct mobile user redeem point when they use redeem code.

SRS-15: The system shall verify redeem code

SRS-58: The system shall deduct mobile user redeem point

SRS-59: The system shall update redeem code status

URS-34: Shop owner can view promotion list

Shop owner can view promotion list

SRS-40: The system shall get data from database

SRS-43: The system shall provide user interface to show promotion list

URS-35: Shop owner can view promotion information

Shop owner can view promotion information

SRS-40: The system shall get data from database

SRS-44: The system shall provide user interface to show promotion information

3.3.3 Guest (Web Server)**URS-36: Guest can send register request**

Guest can send register request to admin. Guest have to input the account information.

SRS-60: The system shall provide register request page to send request to register.

SRS-07: The system shall check not available email in database.

SRS-11: The system shall check all input required.

SRS-61: The system shall record new request into database.

CHAPTER 4 | SPECIFIC REQUIREMENT

4.1 Use case Scenario

4.1.1 Web server use case diagram

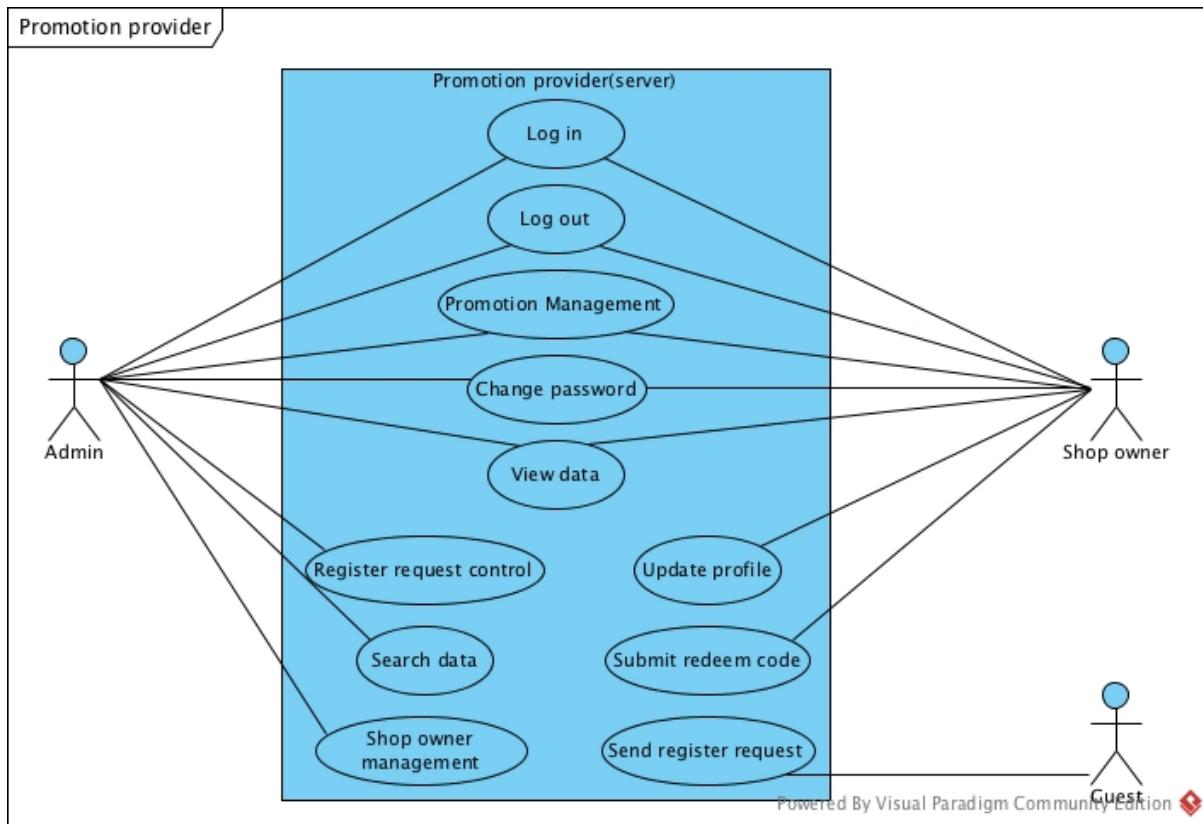

Figure 3.1: Promotion provider system

Figure 3.1 shows all actors in the system that are the admin, shop owner, and guest. Both admin and shop owner can log in, log out, manage promotion change password and view data. The guest can only send register request to become a member of the system. The differences between admin and shop owner are admin can control register request, search data and manage user while shop owner can submit redeem code and update their profile.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	21 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

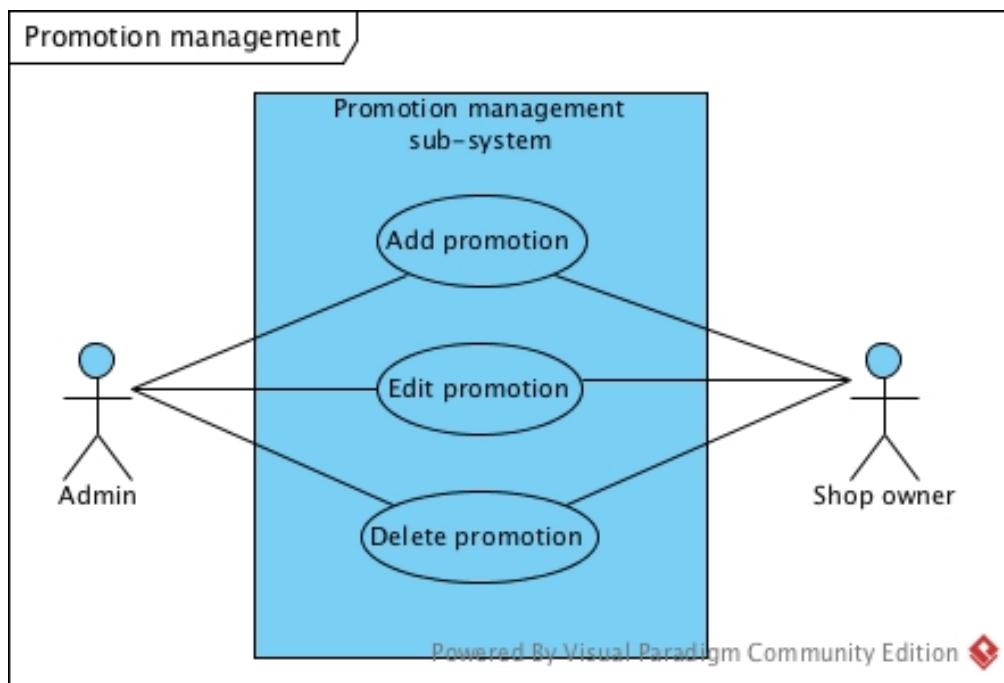

Figure 3.2: Promotion management sub-system

Figure 3.2 shows promotion management sub-system that has two actors, admin and shop owner. Admin can add promotion to shop owner account, edit use promotion and delete unwanted user promotion. The shop owner can add promotion to their account, edit their promotion and delete the promotion. Admin can manage all promotion in the system, but the shop owner can manage only their promotion.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	22 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

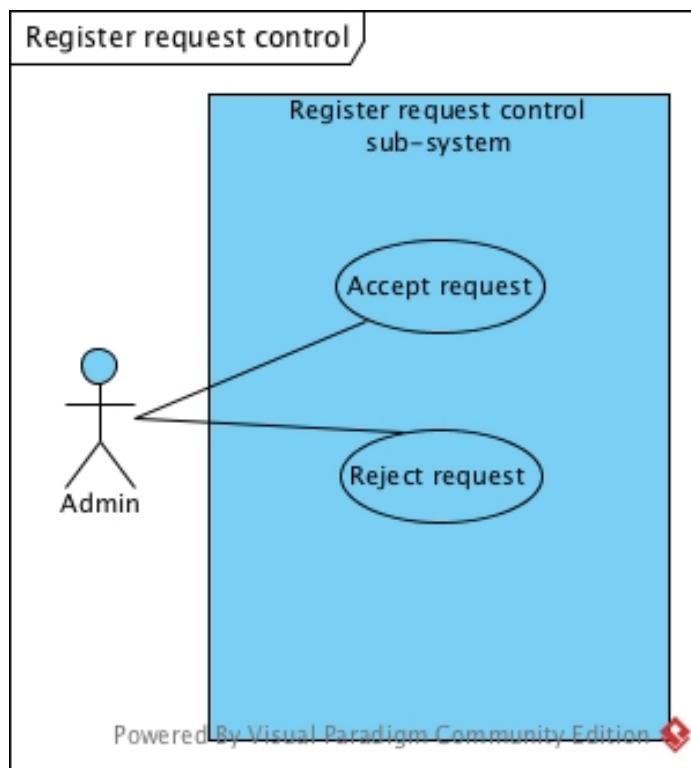

Figure 3.3: Register request control sub-system

Figure 3.5 shows register request control sub-system that has admin as an actor. Admin can control register request by accept request or reject request.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	23 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

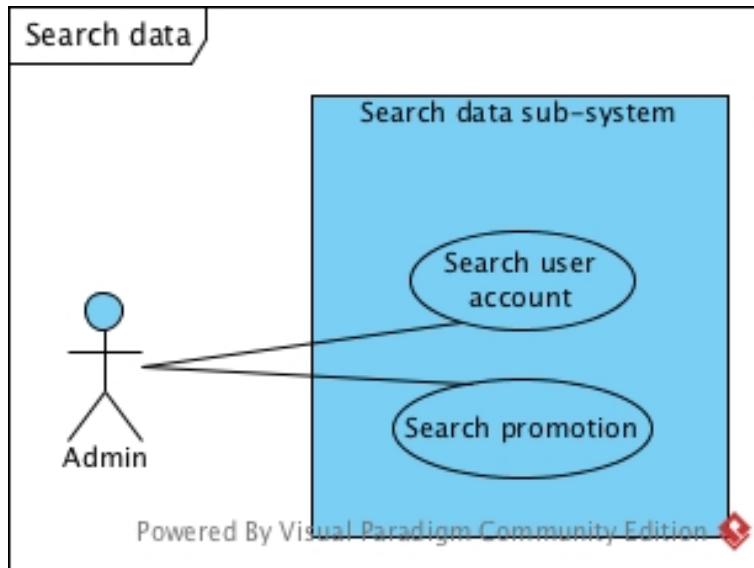

Figure 3.4: Search data sub-system

Figure 3.6 shows search data sub-system that has admin as an actor. Admin can search for the shop owner account by name, id or email. Admin can search promotion by name, id or shop name.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	24 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

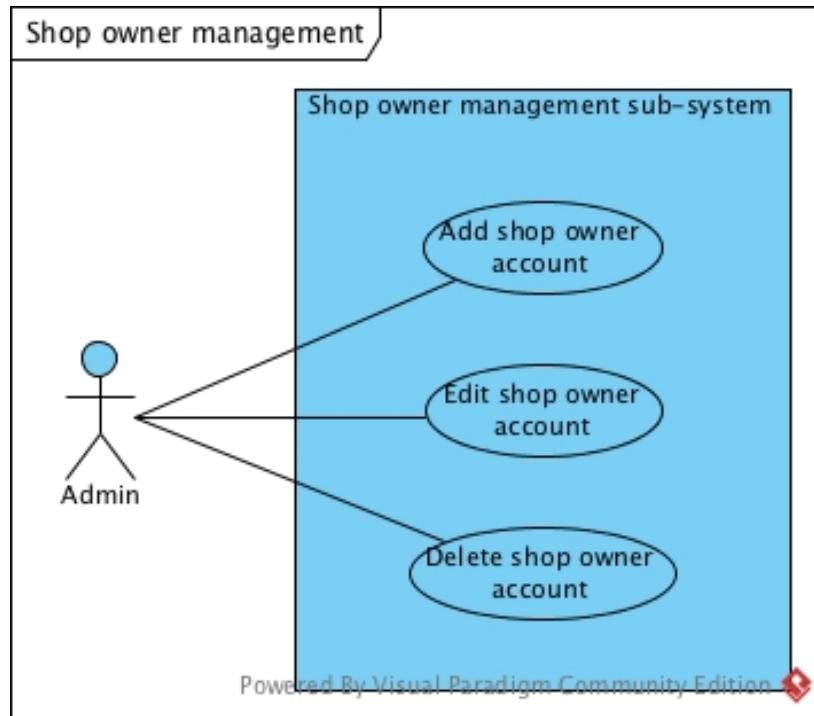

Figure 3.5: Shop owner management sub-system

Figure 3.7 shows shop owner management sub-system that has admin as an actor. The admin can manage shop owner account that are add, edit, and delete. The add operation required the admin to input user information that are shop name, email, password, open and close time, address, phone number and description.

Document Name	Promotion Provider_SRS_1.0	Owner	Project Team	Page	25 / 10
Document Type	Software Requirement Specification	Release Date	29 July 2015	Print Date	29 August 2015

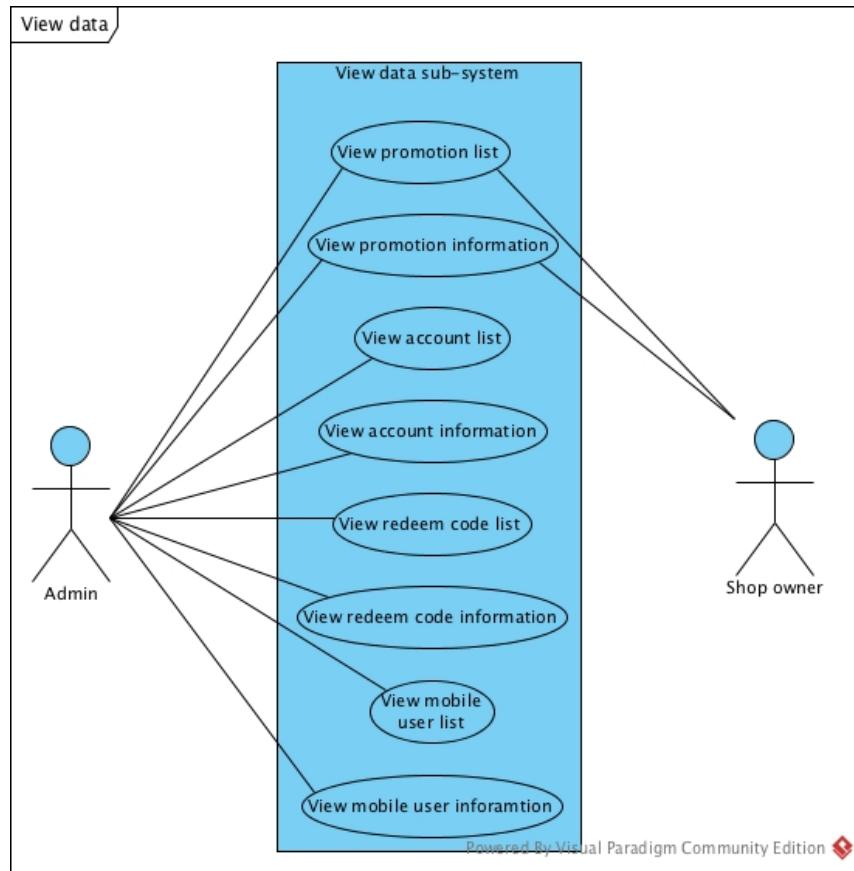

Figure 3.6: View data sub-system

Figure 3.8 shows view data sub-system. The admin actor can view every data or information in the system that are promotion, account, redeem code and mobile user. In the other hand shop owner can view only their promotion data.

4.2 Use Case Description

4.2.1 Web server user case description

Use case ID:	UC-WS01		
Use case name:	Send register request		
Created by:	Tanawat	Last update by:	Tanawat
Created date:	June 22, 2015	Last update date:	June 22, 2015

Actor(s):	Guest
Description:	Guest send register request to admin to become a shop owner in web server.
Trigger:	None
Pre condition:	None
Post condition:	1. Register request appear to admin
Input:	1. shop name, type: string 2. email, type: string 3. password, type: string 4. address, type: string 5. phone number, string 6. open and close time, type: string 7. latitude, type: double 8. longitude, type: double 9. description, type: string 10. image: type string
Normal Flow:	1. The guest open web server 2. The guest clicks “Join WAP” button 3. The system provides the user interface to get the input that are shop name, email, password, address, phone number, open and close time, latitude, longitude, description and image. 4. The guest input shop name, email, password, address, phone number, open and close time, latitude, longitude, description and image. 5. The system verifies inputted data from guest 6. The system records register request in database 7. The system redirect guest to index page
Alternative Flow:	5.1 If guest input existing email, or minimum character length not reach the minimum required that is four, and guest do not input all fields. Then system will not record request to database 5.2 System shows error message 5.3 Allow guest go back to step#3
Priority:	2
Exception:	None
